Catalyst IT – expert open source solutions

- Delivering solutions and services using open source software and tools
- Founded in 1997
- Has since grown to multiple companies internationally – New Zealand, Australia, United Kingdom, Canada, Europe
- Hosts the New Zealand Open Source Awards
- Provides only New Zealand owned and operated cloud computing service
- Invests in the next generation of tech professionals

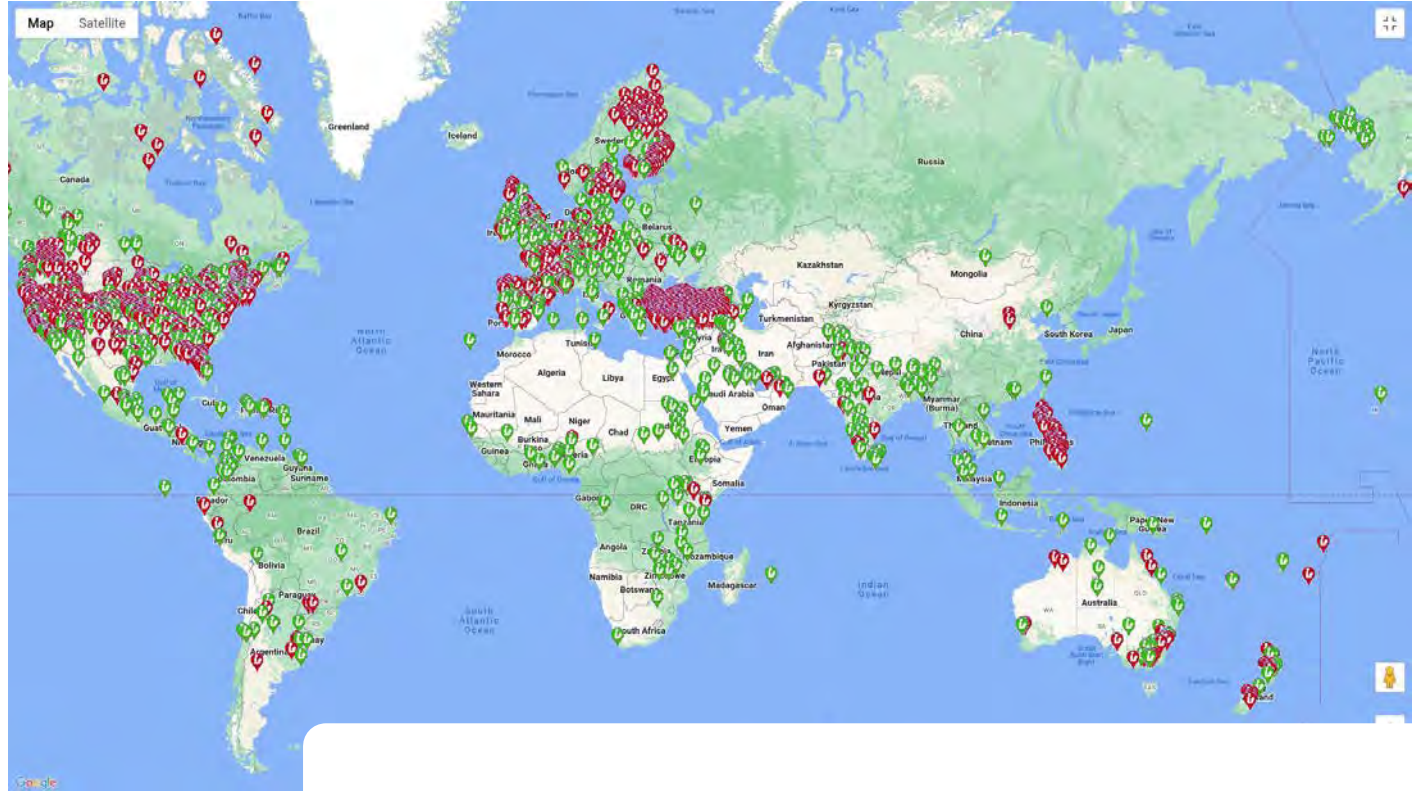

Open source software

- Code that is free to use and share
- Can be viewed, copied, developed
- Maintained by a community
- Developed to meet, and respond to, needs of the community

The overlap of open source software values and Indigenous values

1) (noun) gift,
present, offering,
donation,
contribution -
especially one
maintaining social
relationships and
has connotations
of reciprocity

History of Koha

manaakitanga / kindness, generosity, support
whanaungatanga / relationship, connection
tuakana-teina / elder-younger

Koha bug workflow

Bug 19532 - Recalls for Koha ([edit](#))

Importance: P1 - high ▾ new feature ▾ with [125 votes](#) ([vote](#))

Deadline: 2017-12-01

Assignee: [Aleisha Amohia](#) ([edit](#))

[Liz Rea](#) 2017-10-25 23:27:56 UTC

[Description](#) Private [\[tag\]](#) [\[reply\]](#) [\[-\]](#)

Preface:

I know this will be quite an interesting feature for lots of people. Catalyst is doing a working proof of concept for this feature. The requirements we have given to Aleisha are firm, and we will not be scope creeping them. Additional features are welcome once this initial development is either accepted or supplanted by something else.

That said, we welcome comment and suggestions on the patches we will attach here, and view this as a starting point instead of a complete solution.

Expected scope of the feature to include:

- Ability for borrowers to place a recall on a book from the OPAC results and detail, if it is checked out (question, do we offer to issue a recall if only one copy of say 3 is checked out?)
